

5	<p>The only correct answer is D because this uses the formula $W = \frac{1}{2} QV$ and takes account of charge being measured in nC</p> <p>A is not correct because this gives capacitance of the capacitor in nF</p> <p>B is not correct because this uses an incorrect formula</p> <p>C is not correct because this does not take into consideration charge being measured in nC</p>	1
